

INTEROFFICE MEMORANDUM

DATE: September 17, 1997
TO: Gary Konwinski, Environmental Manager, B116, X2729
FROM: Bob Cathel, RCRA Custodian 750 Pad / B788, T893A, X6880 *BC*
SUBJECT: ACTION TO KAISER-HILL ASSESSMENT-GRK-236-97

Following is the status to 8 items of concern in an August 27, 1997 memo to Steve Dewitt. The area of concern is the solar pond area, RCRA Unit 21, Building 964, and the surrounding area including an inactive lay-down area formerly managed by J. A. Jones.

Status (items listed as per above referenced letter): *I need this attached*

1. The attached 9/24/96 memo to S. R. Garcia from P. W. Edrich has been placed in the travelers of the appropriate drums. Furthermore, all the drums that contain liquid have been placed in secondary containment. *(1)*
2. The IDC/WFC Description has been updated in WEMS to RCRA REGULATED SLUDGE-L L MIXED HAZ. WASTE which accurately reflect the waste material. *need to do this*
3. Per your letter you are "currently preparing a permit modification to include the concrete pad that stores this waste as a portion of Unit 21." *take out parts & decon equip*
4. The equipment in and around the solar ponds was utilized to remove material from the solar pond. It is now RCRA Empty and is partially funded for removal in conjunction with the RCRA tabilization of the clarifier tank in FY98. *Expand on this*
5. The drum G02876 is empty and being appropriately managed. *(what was in it)*
6. The black plastic drum liner is no longer accumulating rain water. The 5-gal can is roofing cement (an-asphalt sealer) per discussion with Steve Dewitt and Craig Smith. This material is excess material and considered non-hazardous. *then it is a chemical, must be in drums & disposed*
7. The owner of the lay-down area formerly managed by J. A. Jones is RMRS and is partially funded for cleanup in conjunction with the RCRA stabilization of the clarifier tank in FY98.
8. The ownership of the two wooden crates is RMRS. The liquid in the tanks on the decon pad is decon water from the pond material removal. This liquid will be sampled and appropriately managed.
